We invented  
fastening systems that  
make it happen.

In the 1960's Dennison's original Swiftach® system revolutionized the fastening industry.

Avery Dennison continues to innovate and improve upon the products that people use in fastening operations. Fastening solutions from Avery Dennison provide manufacturers and retailers a high quality, cost effective way to connect with their customers. Easy-to-use tools deliver plastic fasteners that allows you to "communicate" product benefits, pricing, detailed instructions, even brand identity. What's more, with Avery Dennison's new products, you can secure items together, package and streamline your production process. Which system is right for you? The following pages are organized into product categories – each suited to different applications.

**MicroTach™** A better alternative to thread, glue, metal staples and pins. Save time, labor, and money with Avery Dennison's smallest most versatile Swiftach fastener. The small diameter needle delivers a unique T-End™ fastener that secures items tightly and quickly yet is easy to remove.

page 3

**MicroTach™** – The newest, smallest fastening system developed for packaging and work-in-process applications. Perfect for attaching soft goods to card stock such as doll accessories or basting fabric materials during in-process manufacturing.

page 4

**MicroPin™** – A simple pull is all it takes to remove a Micro Fastener. Good news when you consider that consumer tests show that 99% of customers prefer plastic micro fasteners to pins when unwrapping a shirt.

page 5

**Elastic Staple™** – Automated fastening alternative. The VNS version is a labor saving alternative to twist ties, clam shells, skin pack, and tape. The SNS version is ideally suited to pairing bulky items such as socks. Available to Authorized Elastic Staple Distributors only.

page 6

**Plastic Staple™** – Developed for easy removal and, unlike metal staples, won't damage fabrics. Tickets stay in place until removed by the customer at home so there are fewer lost tickets.

page 7

**Standard Family™** – Our largest category of tools and fasteners, allowing applications of four different fastener styles for use in most general purpose and heavy duty applications. Available in a wide range of lengths and colors.

page 12

**Fine Fabric™ Family** – The right system for reducing the risk of holes and snags when attaching tags to delicate and tightly knit fabrics such as silk, fine linens and infant wear garments.

page 13

**Dry Cleaning™** – Developed especially for the dry cleaning industry. Small Fine Fabric™ Needles keep expensive garments safe from damage when attaching dry cleaning tags.

page 14

**System 1000™** – Tag 1000 items without reloading! A unique mechanism advances the specially designed "connected paddle" fasteners for both general purpose and heavy duty applications. A proprietary product from Avery Dennison.

page 15

**Brand ID™** – Now you can customize your merchandise with branding, size or logistical information with one efficient fastening system. This innovative solution can be molded in virtually any color and the paddle of the fastener can be imprinted with your trademark, color scheme, size information, or serial number.

page 16

**Extra Heavy Duty T-End™** – Designed specifically for packaging and as a shoe lasting fastener system to simplify in-process shoe lasting. Also ideal for packaging applications that require higher tensile strength.

page 17

**Mattress Fastening System™** – Eliminate messy spray, hot melt gule, and water based adhesives in one quick click. Just insert the long extra heavy-duty needle through multiple foam layers, and click.

page 18

**Super Heavy Duty Fasteners™** – Specifically made from a strong nylon material. **Commercial Buttoner System™** – Ideal for tagging in the food industry. Features a unique drain hole made from corrosion material, allowing repeated cleanings.

page 19

**Tag Fast™** – Made for use in many assembly applications such as pleating, bar tacking, spacing, closing and joining. Used extensively in the auto industry. **Horticultural Tool™** – Designed to meet the rugged, outdoor needs, such as plant tagging.

page 20

**Secur-a-tach™** – The economical solution for tagging hard goods, for a fast and secure attachment.

page 21

**Swiftach™ Power Units (SPU)** – Choose one of our pre-configured power driven fastening units or custom build your own system. You'll realize greater efficiency and profitability with Swiftach Power Units.

Pkg Qty 1

**No. 11040 MicroTach™ Pistol-Grip Attaching Tool**

A lightweight hand tool with metal feed mechanism for durability and greater reliability. This hand tool is portable and fast. Perfect for attaching soft goods to card stock or basting fabric material during in-process manufacturing.

**MicroTach™ Replacement Needle**

## Virtually invisible and customer safe

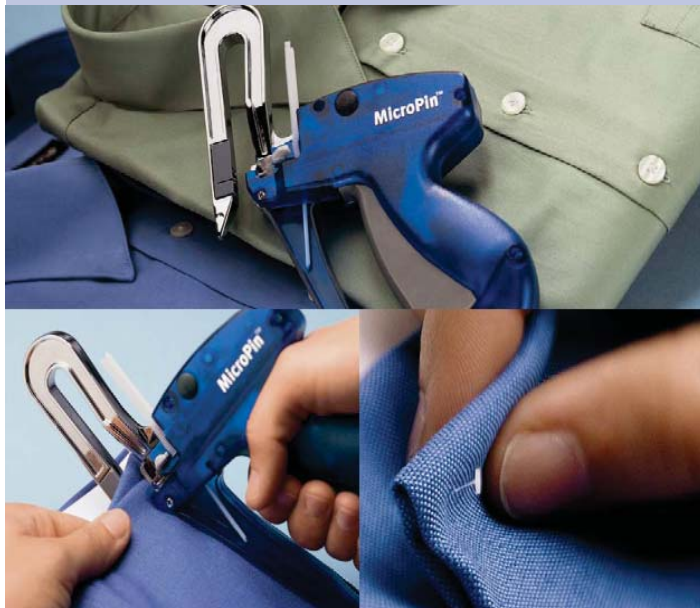

A simple pull is all it takes to remove a Micro Fastener. Good news when you consider that consumer tests show that 99% of customers prefer plastic micro fasteners to pins when unwrapping a shirt. Shirts look better on display too. And no holes in the fabric means merchandise can go back on the shelf, instead of the clearance rack. The ergonomically designed MicroPin Tool is easy and safe to use, and is designed specifically to fit into current industry shirt-folding methods.

## New Packaging Technology

Faster, easier, and a better alternative to some of the current conventional packaging technologies. Elastic Staple fasteners are loaded in the system automatically and advance after each actuation. There are six available fastener lengths from 1/2" (12.7 mm) to 2 1/2" (64 mm).

**No. 11044 MicroPin™, Standard Hook**  
It's a proven fact – pin-less packaging is totally painless. In consumer testing 99% of customers preferred plastic micro fasteners to metal pins when unwrapping a shirt to try it on. For one thing, customers don't have to worry about getting stuck by pins when removing micro fasteners. A simple pull is all it takes. The fastener pops free and the consumer is ready to enjoy your product. No hidden pins in the fabric. No sharp pins on the floor.

Contact the nearest Avery Dennison office for a full line brochure on this product.

Elastic Staple™ Variable Needle Fastening System (VNS) offers industrial packaging operations a labor-saving alternative to twist-tie, metal staples, clam shell, skin pack, tape and other conventional fastening technologies. This new system efficiently fastens items such as house- wares, toys, and hardware to paper packaging. It can be operated as a stand-alone unit or integrated into any automated packaging line.

**No. 10747 Elastic Staple™ Variable Needle System (VNS)**  
Dual, variable needles adjust to accommodate various product sizes. Accessories, such as the linear slide stand, counter balance and anvils, are sold separately.

The Elastic Staple™ Single Needle System (SNS) effectively pairs together bulkier items. Packaging together multiple pairs of socks is a perfect example.

**No. 10746 Elastic Staple™ Single Needle System (SNS)**  
SNS uses a single needle to insert the fastener's T-end through the product. Merchandise looks more appealing and product presentation stays consistent.

## Plastic Staple® Fastening System

First for quality, durability and reliability. Still the apparel industry standard for attaching pocket flashers, waist tickets and creating wear lines or "whiskering" affects. Customers prefer Plastic Staple® fasteners because they're so much easier to remove and, unlike metal staples or bar tacks, they won't damage fabrics. For authorized distributors only.

## The original Swiftachment® Fastening System

was invented by Dennison in the early 1960's. It is still the industry preference for tag attaching. Each tool is comfortable, lightweight, and designed to be durable and reliable. Standard fasteners come in two strengths: General Purpose, and Heavy Duty for extra strength. All Standard tools accept both 50 and 100 per clip Swiftach Standard fasteners.

Tickets stay in place until removed by the customer at home so there are fewer lost tickets.

Designed for low maintenance and easy use, Plastic Staple® fasteners can be molded in any color, and adapt easily to all kinds of materials from denim to dog leashes.

No wonder these fasteners have remained the industry standard since Avery Dennison introduced the first Plastic Staple® fastener in 1988.

Pkg Qty 1

### No. 10651 Mark III™ Pistol Tool

Improved ergonomic design and an easy-squeeze mechanism offer increased operator comfort.

Pkg Qty 1

### No. 10636 Mark III™ Long Needle Pistol Tool

The extra long stroke and needle are designed for tagging bulky merchandise.

Pkg Qty 1

### No. 08945 Mark II™ Standard Scissor Tool

The unique Swiftach scissor style tool is designed for tagging many flat or hanging goods.

<sup>1</sup> For use with Long Needle Pistol Tool and Standard SPU power units only, see page 21

Our fastener clips are made for easy and fast loading.

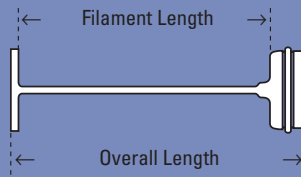

All Avery Dennison needles are precision-crafted with a rounded tip and a smooth, exact profile to prevent snagging. Safe to use on general purpose fabrics. All replacement needle kits can be used with all Standard hand tools, except No. 10645. (Use No. 10645 with the Long Pistol Tool or Standard SPU power units.)

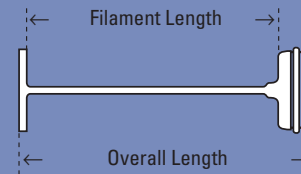

Fastener measurements are approximate; for more detailed information contact customer service or your local Sales Specialist

STANDARD FAMILY

**Paddle Fasteners** Avery Dennison offers the widest range of sizes and colors for any general tagging application. Available connected paddle design eliminates tangling and provides a built-in "pull test" to tell operators that fasteners are properly inserted. The large paddle "head" offers an added benefit; security. It prevents ticket switching which is sometimes possible with other brands of fasteners.

**No job is too tough for Swiftach®** Manufactured with high strength Nylon, Heavy Duty Paddle fasteners from Avery Dennison stand up to even the most demanding applications. Requests for unlisted colors or lengths are always welcome.

1/2" - 1" (13 - 25 mm)		STANDARD	POLYPROPYLENE					
Stock No.	Style - Color	Overall Length	Filament Length	Min. Tensile*	Connected Paddle	Per Clip	Pkg Qty	Case Qty

Heavy Duty Paddle fasteners are the ideal solution for tougher applications like these denim jeans.

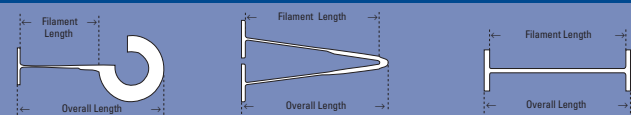

Heavy Duty Paddle fasteners are also the ideal solution for pairing layered applications.

Fastener measurements are approximate; for more detailed information contact customer service or your local Sales Specialist

FINE FABRIC™ FAMILY

**Hooks, Loops, and T-Ends;** the easy and productive solution for packaging, fastening, and display applications. Hook-tach fasteners are available in both general purpose and heavy-duty styles. Hosiery and headwear items are ideal for this type of fastener.

**Delicate applications are no problem.** Fine Fabric™ is the right system for reducing the risk of holes and snags when attaching tags to delicate and tightly knit fabrics such as silk, fine linens and infant wear garments. All Fine Fabric hand tools accept both 50 and 100 clips.

\* Minimum tensile strength after application.

Loop fasteners are fired twice. Ideal for tagging rugs, hanging soft goods, securing products in place, and pairing items together.

T-Ends help provide a secure attachment and a finished look. They work well in pairing, packaging and product assembly.

The Fine Fabric system is always the one to use when tagging delicate items such as undergarments and other fine fabrics. Designed with a fine needle to greatly reduce the likelihood of holes and snags.

Pkg Qty 1

**No. 10312 Mark III™ Fine Fabric™ Pistol-Grip Tool**

Optimized spring tension and short trigger stroke provide a smooth feel. Tag rest allows one-handed tagging.

Pkg Qty 1

**08946 Fine Fabric™ Scissor-Grip Tool**  
Designed like all Fine Fabric tools for durability and operator comfort, this tool's scissor-grip design is best used to tag hanging and flat goods.

**Fine Fabric™ Replacement Needles**

Our connected paddle fastener clip makes loading fast and easy.

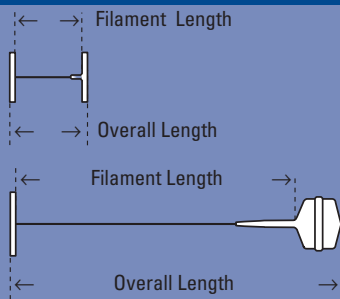

Avery Dennison Fine Fabric replacement needles feature a slimmer profile and special finish to significantly reduce the risk of causing holes and snags in garments.

Fastener measurements are approximate; for more detailed information contact customer service or your local Sales Specialist

DRY CLEANING FAMILY

**Fine Fabric™ Fasteners** are available in clips of 50 and 100 fasteners. Each fastener is molded to have a smaller profile to reduce the risk of holes or snags. Paddle style fasteners are suited for insertion into tightly knit and delicate, non-woven fabrics. T-End style fasteners provide a secure attachment when a paddle is not needed.

**Avery Dennison Dry Cleaning Kit** Designed to operate with Fine Fabric™ Needles, expensive garments are safe from holes and snags. Avery Dennison's Dry Cleaning Kit is easy and customer friendly.

SYSTEM 1000® FAMILY

SYSTEM 1000 BRAND ID FASTENER

**Tag 1000 garments without reloading –** that's twenty times more than ordinary attaching tools. Any operation that measures productivity will gain from the advantages of the Swiftach® System 1000®. Large paddle style fasteners prevent ticket switching and have no waste strip to discard when the operator is finished.

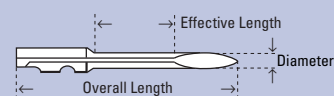

## A versatile fastener build your brand!

Now you can customize your merchandise with branding, size or logistical information with one efficient fastening system. This innovative solution can be molded in virtually any color and the paddle of the fastener can be imprinted with your trademark, color scheme, size information, or serial number etc. It is an ideal alternative to expensive preprinted brand or size tickets or size rings on hangers. The System 1000 Brand ID Fastener is available in the VICS Color For Size standard and can be easily customized to other standards. And fasteners can be applied easily by pneumatic bench mount or by hand tool at source, distribution center, or store.

No. 10000-3 System 1000® Hand Tool

Features a unique mechanism that helps prevent gun jams and advances the proprietary designed "connected paddle" fasteners smoothly to save effort and maximize productivity. For industrial applications, air powered System 1000 units are available. See page 24 for more details.

### Increase Brand Visibility

Contemporary merchandising and marketing emphasizes brand building. System 1000™ Brand Identification Fasteners are an innovative fastening solution designed to position your brand at the forefront of consumer visibility.

System 1000™ Brand Identification Fasteners offers a new and unique capability to include information on tag attaching fasteners. Fasteners can be molded in virtually any color you can imagine. Logos, Brands, Retail Store names and Size information are just a few of its applications.

- Fasteners can be printed on front, back or both
- 3 color printing plus color of fastener

Can be customized to any color standard.

## Works faster, holds better than glue or adhesives

Start saving time and money every day with the Avery Dennison Mattress Fastening System. It eliminates messy sprays, hot melt guls, and water based adhesives in one quick click. Just insert the long extra heavy-duty needle through multiple foam layers, and click. Mattress foam layers stay secure long after foams and glues fail and there's never any customer-unfriendly crackling noise. The Mattress Fastening System eliminates curing time, secures flanges in a snap, and can even fasten foam encasements.

## Extra Strength for Shoe Lasting and Packaging

The Extra Heavy Duty T-End™ system is designed to simplify in-process shoe lasting and for packaging. Available as a portable hand tool and industrial unit for stationary operations. Avery Dennison offers a wide selection of high tensile strength fasteners to be used with large or small eyelets.

No. 10778 Extra Heavy Duty T-End™ Hand Tool

Save time and money with the system designed to simplify in-process shoe lasting. High tensile strength fasteners hold shoe eyelets securely.

SWIFTACH® POWER UNITS

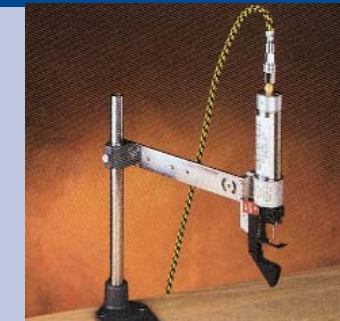

**Avery Dennison Swiftach® Power Units (SPUs)** increase productivity, especially when its faster to bring the garment to the tool. All units are powered by air compression. Whether you choose one of the pre-configured units below left or custom build your own system, you'll realize greater efficiency and profitability.

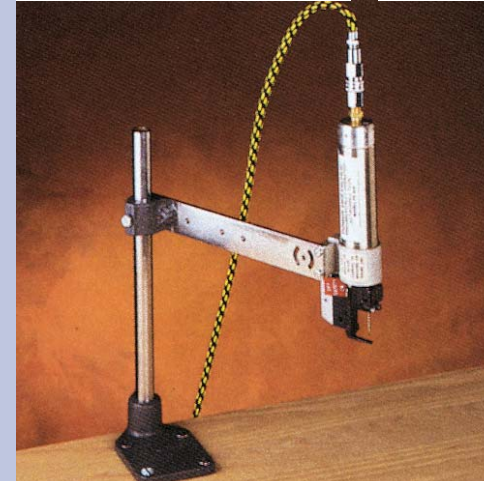

PRE-CONFIGURED UNITS

**PS 100 – No. 08920**  
A complete hand held unit that compresses and clamps the item and then inserts the fastener. Typical applications: use with 9" T-End™ to pair shoes, and with 3" Swiftach™ to attach tags to textile tubes. 60-80 PSI recommended. Optional equipment: Filter Regulator (#08998) Compatible fasteners (Standard)

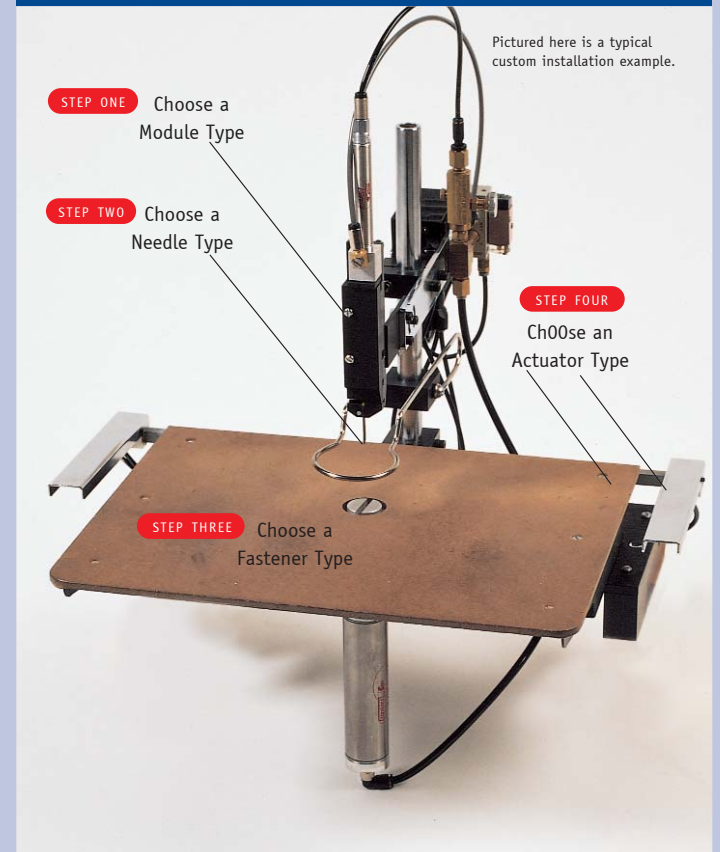

**PS 200 – No. 08924**  
A power attaching cylinder suitable for bench mounting that compresses and clamps the item and then inserts the fastener. Typical application: use with 1/4" T-Ends™ to fasten surgical pads together. 60-80 PSI recommended Optional equipment: Bench Mount Bracket Assembly (#08992); Foot Pedal with Filter Regulator and hoses (#08999) Compatible fasteners (Standard)

**PS 600 – No. 08925**  
A power attaching cylinder, suitable for bench mounting, with a blunt nose for application where clamping action is not required. Actuation consists of needle projecting beyond blunt nose and inserting the fastener. Used to attach T-Ends™ to automotive weather stripping assemblies. Optional equipment: Bench Mount Bracket Assembly (#08992); Foot Pedal with Filter Regulator and hoses (#08999) Compatible fasteners (Standard)

CUSTOM BUILT UNITS

Pictured here is a typical custom installation example.

**CUSTOM UNITS Follow four simple steps**

to determine the best component system for your needs. Pictured above is a sample assembly of components. Your custom designed power unit may be different depending on your specific application. Custom built power units afford greater versatility and flexibility and can increase productivity.

The pages that follow provide a step-by-step guide to help you build just the right system for your needs. Custom-built power units are categorized by different tagging type: Standard (general purpose), Fine Fabric,™ System 1000,™ Extra Heavy T-End,™ and Buttoneer.™ Our Customer Service Team or your local sales specialist is available to answer any questions and walk you through this procedure. Each differently configured power unit must be ordered separately. Please allow 4-6 weeks for delivery.

STANDARD SWIFTACH® POWER UNITS

FINE FABRIC™ POWER UNITS

**General Purpose Applications:** Standard Swiftach® Power Units can make your information attaching, brand identification and packaging operation faster and easier. Knit shirts and most light to medium weight materials are well suited to the Standard family. Refer to pages 7-9 for a complete listing and description of available fasteners. Hand tools are also available.

**Fine Fabric™ Applications** Make your information attaching, brand identification and packaging on delicate and tightly knit fabrics easier and faster with Fine Fabric Swiftach® Power Units. A slimmer profile needle and fastener design guards against holes and snags in such items as scarves, lingerie, and hosiery. Hand tools are also available.

**STEP ONE Choose a Module**

Pkg Qty 1

**SPU1Mo1 Mark II Industrial Standard Long E-Rod for Long Needle**  
This module will feed both Standard and Super Heavy Duty (SHD™) fasteners and is used for garments or items with a compression thickness up to 13/16". A filter regulator (08998) is available.

Pkg Qty 1

**SPU1Mo3 Mark II Industrial Standard Short E-Rod for Short Needle**  
This module will feed both Standard and Super Heavy Duty (SHD™) fasteners and is used for garments or items with a compression thickness up to 9/16". A filter regulator (08998) is available.

**STEP ONE Choose a Module**

Pkg Qty 1

**SPU2Mo2 Mark II Industrial Fine Fabric Long E-Rod for Long Needle**  
This module will feed Fine Fabric™ fasteners and is used for garments or items with a compression thickness up to 13/16". A filter regulator (08998) is available.

Pkg Qty 1

**SPU2Mo4 Mark II Industrial Fine Fabric Short E-Rod for Short Needle**  
This module will feed Fine Fabric™ fasteners and is used for garments or items with a compression thickness up to 3/8". A filter regulator (08998) is available.

**STEP TWO Choose a Needle Type**

Replacement Needles

Stock No.	Description	Application Thickness	Needle Strength	Max. Fil. Length	Replac. Needle Kit
SPU1N	Long Heavy Duty All-Steel	13/16"	EXTRA STRONG	1"	10645
SPU2N	Short Heavy Duty All-Steel	9/16"	EXTRA STRONG	1/2"	08913
SPU3N	Standard Short Plastic Base	9/16"	STANDARD	1/2"	08941
SPU4N	Long All-Steel - For use with SHD Fasteners	13/16"	EXTRA STRONG	1"	10643
SPU5N	Short All-Steel - For use with SHD Fasteners	9/16"	EXTRA STRONG	3/4"	10644

**STEP THREE Choose a Fastener Type**

All Standard Family Fasteners are compatible with Standard Modules SPU1Mo1 and SPU1Mo3. A complete listing can be found on pages 7-9.

**STEP TWO Choose a Needle Type**

Replacement Needles

Stock No.	Description	Application Thickness	Needle Strength	Max. Fil. Length	Replac. Needle Kit
SPU6N	Fine Fabric™ Long All-Steel	13/16"	STANDARD	1"	10679
SPU7N	Fine Fabric™ Short All-Steel	3/8"	EXTRA STRONG	1/4"	10070
SPU8N	Fine Fabric™ Short Plastic Base	3/8"	EXTRA STRONG	1/4"	08944

**STEP THREE Choose a Fastener Type**

All Fine Fabric™ Family Fasteners are compatible with Fine Fabric™ Modules SPU2Mo2 and SPU2Mo4. A complete listing can be found on pages 10-11.

**STEP FOUR Choose an Actuator Type**

See page 26 for all the actuator choices

**STEP FOUR Choose an Actuator Type**

See page 26 for all the actuator choices

SYSTEM 1000® POWER UNITS

EXTRA HEAVY DUTY T-END

**Tag 1000 garments without reloading,** System 1000® holds 1000 fasteners – twenty times more than ordinary tag attaching tools. Any tagging operation that measures productivity will gain from the advantages of System 1000 Power Units.

### Extra Heavy Duty T-End™

Power Unit is the ideal fastening system for in-process shoe lasting and heavy duty packaging applications. High tensile strength fasteners securely hold both eyelets.

BUTTONEEER® POWER UNITS

**Buttoneer® Power Unit** fastening system is useful in many assembly applications; pleating, bar tacking, spacing, closing or joining.

**STEP ONE Choose a Module**

Pkg Qty 1

**SPU5M Industrial System 1000®**  
There is only one version of this module. It runs only reels of 1000 paddle fasteners for garments or items with a compression thickness up to 1½". A filter regulator (08998) & Replacement Stock Container (10705) are available.

**STEP ONE Choose a Module**

Pkg Qty 1

**SPU4M01 Extra Heavy Duty T-End Industrial Tool**  
There is only one version of this module. This module will only run Extra Heavy Duty T-End Fasteners.

**STEP ONE Choose a Module**

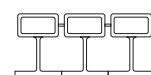

Pkg Qty 1

**SPU1Mo4 Mark II Industrial Buttoneer®**  
There is only one version of this module. This module will run only Buttoneer® style fasteners for garments or items with a compression thickness up to 9/16".

**STEP TWO Choose a Needle Type** Replacement Needles

Stock No.	Description	Application Thickness	Needle Strength	Max. Fil. Length	Replace. Needle Kit
SPU10N	S1000® Short Heavy Duty All-Steel	9/16"	EXTRA STRONG	5/8"	10074
SPU11N	S1000® Long Heavy Duty All-Steel	15/16"	EXTRA STRONG	1"	10841
SPU12N	S1000® Extra Long Heavy Duty All-Steel	1-1/2"	EXTRA STRONG	1-1/4"	10842

**STEP THREE Choose a Fastener Type**

System 1000® Fasteners are compatible with the System 1000® Module SPU3M only. A complete Fastener listing can be found on page 15.

**STEP TWO Choose a Needle Type** Replacement Needles

Stock No.	Description	Application Thickness	Needle Strength	Max. Fil. Length	Replace. Needle Kit
10776	Extra HD T-End (Blunt Tip)	1.55" 39mm	.95" 24mm	.115" 3mm	4
10777	Extra HD T-End (Pointed Tip)	1.85" 47mm	.88" 22mm	.115" 3mm	4

**STEP THREE Choose a Fastener Type**

See page 16 for complete fastener listing.

**STEP TWO Choose a Needle Type** Replacement Needles

Stock No.	Description	Application Thickness	Needle Strength	Max. Fil. Length	Replace. Needle Kit
SPU2N	Short Heavy Duty All-Steel	9/16"	EXTRA STRONG	1/2"	08913
SPU3N	Standard Short Plastic Base	9/16"	STANDARD	1/2"	08941
SPU9N	Standard Extra-Short	3/16"	STANDARD	1/8"	10876

**STEP THREE Choose a Fastener Type**

See fastener listing on page 18. Buttoneer Fasteners are compatible with the Buttoneer Module SPU1Mo4 only.

**STEP FOUR Choose an Actuator Type** See page 22 for all the actuator choices

**SPU3A System 1000® Pistol Grip Actuator (Hand Held)**  
This version uses a trigger actuator and can be used with the System 1000 module only.

**STEP FOUR** See page 22 for all the actuator choices

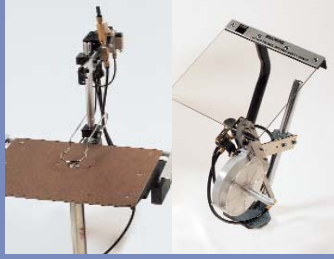

**STEP FOUR** See page 22 for all the actuator choices

## Actuators

There are three different actuating options: hand held, bench mounted, and table compression. Note that each actuating option lists the specific families with which they are compatible.

**BENCH MOUNT OPTIONS**

Pkg Qty 1

**SPU4A Benchmount Foot Pedal**  
This unit is primarily used for brand identification and price tag marking. **Works with all SPU Modules.**

Pkg Qty 1

**SPU5A Benchmount Hand Button-Finger Switch** This unit is primarily used for brand identification and price tag marking. **Works with all SPU Modules.**

**HAND HELD OPTIONS**

Pkg Qty 1

**SPU2A Standard Pistol Grip**  
This version uses a trigger actuator. **Works with Standard, Fine Fabric, Buttoneer, Extra Heavy Duty T-End.**

**TABLE COMPRESSION OPTIONS**

**SPU6A01** Tablemount Hand Buttons Top Compression 1" Stroke  
**SPU6A02** Tablemount Hand Buttons Top Compression 2" Stroke  
**SPU6A03** Tablemount Hand Buttons Top Compression 3" Stroke  
**Works with all SPU modules.**

**SPU7A01** Tablemount Hand Buttons Bottom Compression 1" Stroke  
**SPU7A02** Tablemount Hand Buttons Bottom Compression 2" Stroke  
**SPU7A03** Tablemount Hand Buttons Bottom Compression 3" Stroke  
**Works with all SPU modules.**

**WARRANTY**  
All statements, technical information and recommendations about AVERY DENNISON products are based upon tests believed to be reliable but do not constitute a guarantee or warranty. All AVERY DENNISON products are sold with the understanding that PURCHASER has independently determined the suitability of such products for its purposes. AVERY DENNISON products are warranted to be free from defects in material or workmanship for a period of 90 days from date of shipment. Any product shown to the satisfaction of AVERY DENNISON within the time provided to be so defective shall be replaced without charge or AVERY DENNISON may issue a credit in such an amount

as it deems reasonable; however, in no way shall AVERY DENNISON be responsible for claims beyond the replacement value of the defective product or in any way liable or responsible for consequential or incidental damages.  
**NO EXPRESS WARRANTIES AND NO IMPLIED WARRANTIES, WHETHER OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE, OR OTHERWISE, EXCEPT AS SET FORTH ABOVE (WHICH IS MADE EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES) SHALL APPLY TO THE PRODUCTS DESCRIBED HEREIN. AVERY DENNISON SPECIFICALLY DISCLAIMS AND EXCLUDES ALL OTHER SUCH WARRANTIES, NO WAIVER, ALTERATION, ADDI-**

**TION OR MODIFICATION OF THE FOREGOING SHALL BE VALID UNLESS MADE IN WRITING AND SIGNED BY AN AUTHORIZED REPRESENTATIVE OF AVERY DENNISON.**  
No salesman, representative, or agent of AVERY DENNISON is authorized to give any guarantee, warranty or make any representation contrary to the above.  
**LIMITATION OF LIABILITY**  
In no event shall AVERY DENNISON be liable for any incidental or consequential damages, including but not limited to, loss of profit, loss of use or production or loss of capital. The remedies of PURCHASER set forth herein are exclusive and the total liability of AVERY

DENNISON with respect to any contract, or anything done in connection therewith such as the performance of breach hereof, or from the manufacture, sale, delivery, resale, installation or use of any products whether arising out of contract, negligence, strict tort, or under any warranty, or otherwise, shall not exceed the purchase price of the products upon which liability is based.
