Table of Contents

TXPE6 Thermal Printer w/optional RFID

The SATO 6-inch TXPEX6 Horticulture Thermal Transfer printer with optional RFID encoding capabilities enabling UHF RFID smart label and tag encoding. This SATO printer was designed to support the most demanding Horticultural printing applications. The TXPEX6 can effortlessly handle and print material thickness up to 25 mil, with superior print head quality at 305 dpi (dots per inch), and at speeds up to 12 ips (inch per second). The TXPEX6 can also print tag widths up to 10 inch "Ladder-Style" (sideways); this print orientation maximizes ribbon usage and improves throughput. TXPEX6 included Interfaces (standard): USB, LAN & RTC.

ITEM	DESCRIPTION	PRINTER	QTY PACK	PRINTER WEIGHT	LIST PRICE	U/M

Free setup   *Ongoing support*

UL-247

Stick with the Best

Out of the box and ready to go.
United Label proudly introduces the UL-247 desktop nursery tag and label printer packaged to run with or without a PC. We can design formats, tailored to your specifications, then send to the printer for future recall with the attached keyboard for $865.

OR, using BarTender or NiceLabel, run the UL-247 directly from a PC. Capabilities include database connectivity, graphics, barcodes, QR codes and Mac compatibility.

Uses many of the same roll stock as our larger table top printers.
The UL-247 handles full size rolls of stock (3" core with 8" OD rolls) and a 984' ribbon. Print width is 4.25" wide with a 203 dpi resolution at speeds up to 7" per second. These standard features make the UL-247, pound for pound, the fastest, most versatile, user friendly desktop system for low volume requirements on the market today.

Package includes:
UL-247 thermal transfer printer
External media holder
USB cable (PC-Driven system)
Labeling Software (PC-Driven system)
Pre-formatted labels (Stand-Alone system)
Keyboard (Stand-Alone system)

Other Specs:
Media width: .75" to 4.5"
Media length: .4" to 39.3"
Environmental: 20 - 95% non-
        condensing relative humidity

United Label is an official **Master Distributor of SATO Labeling Solutions, Horticultural Division.** *formerly Economy Label*

Standard printer features:
- Parallel, Serial & USB ports
- **984' ribbon length**
- Dual motor gear driven system
- **2 year limited warranty**
- Upgraded print head
- Mac compatible

Options:
- Ethernet LAN interface
- Memory cards
- Bluetooth

Superior Outdoor Materials:
- Slip-Ons: 1" x 10" & 3/4" x 7"
                Available in 12 colors
- Pot sticks: 1" x 4-1/2" & 1/2" x 3"
                (13 mils thick)
- Labels: Wide selection for plug trays,
                pots and cartons.
                Including: Wal-Mart &
                        Home Depot labels

We're UNITED for Quality & Service

CLNX Plus Series
Thermal Printer

SATO's revolutionary 4-inch, and 6-inch (UHF RFID enabled optional) Industrial class Thermal Transfer printer series, the CLNX Plus has innovation built-in with an intuitive, easy-to-use interface and platform for the most demanding customer applications and harsh environments. This printer has full color display screen and pre-installed printer operational, setup, and "how-to" videos making training, operation, and maintenance is exceptionally easy.

The CLNX Plus features a max print media width, 4.1" and 6.6", respectively and print speed up to 14 ips (varies by printer model), and print quality up to 609 dpi (varies by printer model). This Energy Star compliant Printer, was design with a 60-degres high lift printer mechanism for simple, easy media and ribbon loading, and a collapsible bi-fold side access cover for those tighter print locations. Ideal for tags, RFID tags, labels, and signage. **Call your SATO Authorized Master Reseller for compatible ribbons, tags, labels and additional information.**

TAGGIT® Pro Labeling
Design Software and Database

SATO TAGGIT® Pro is the right label design software to meet your on-demand label printing program requirements. The SATO Team will analyze your needs, assist with installation, perform database modifications to ensure your label printing settings are correct. TAGGIT® Pro allows you to create, design, and print bar codes, text, graphic images, color images or from a database on tags.

- Microsoft ready
- Batch printing
- Database creation, connection, and queries
- Simply add barcodes, images, text (TrueType fonts,) and preset formats for all our labels and graphics
- Free phone support 704-644-1660
- Includes 4,500 preloaded plant database that is Customizable.

Quickly Design and Print Barcode Labels Without IT Help

Get started and finished with label design today. Loftware Cloud delivers a familiar Microsoft Word-like user experience. This means anyone can quickly design professional labels without previous knowledge of barcoding or designer training. Learn more about label design.

Print accurately and consistently without printing errors. Printing labels with dynamic data is different from printing other types of documents. The labeling system needs to enable production and warehouse staff to print quickly and without errors. Loftware comes with an all-in-one printing form that helps users print accurate labels without the risk of error. Learn more about error-free label printing.*

SATO Horticultural RFID Solutions

RFID Tagging is an ID system that uses radio frequency for object identification and tracking purposes. A radio frequency identification (RFID) system includes:

- An RFID tag – an antenna with an integrated circuit, IC for data storage and communication with the RFID reader.

- A read/write device

- A host application for data collection, storage, processing and or transmission.

RFID uses radio waves to automatically identify and track the tags containing electronically stored information attached to plants or inserted into pots.
The SATO RFID solution allows growers to track and store data about their products. Fitting every shelf, row or plant with a RFID tag, growers will be able to monitor stages and progress of potentially every plant in a greenhouse.

Beyond the greenhouse, shipping containers with RFID identification will enable tracking, from the crop to the market.

In addition to tracking, a RFID system provides information such as place of origin or date of harvest.

Thermal Printing (T)

Thermal printing is a system whereby heating of ribbon transfers print onto the surface of the print material.

Print Charges	1-Side	2-Side
Print less than 1"	$10.50/M	$20.50/M
Print 1" or greater	$14.50/M	$26.25/M

UPC Code or Barcode	$3.00/EA.
Consecutive Numbering	$10.00/M
Print color other than Black	$5.75/M

BLUE　**GREEN**　WHITE　**RED**　METALIC WHITE

Flexographic Printing (F)

Often abbreviated to flexo, this is a method of printing most commonly used for packaging. A flexo print is achieved by creating a mirrored master of the required image as a 3D relief in a rubber or polymer material. A measured amount of ink is deposited upon the surface of the printing plate (or printing cylinder) using an anilox roll. The print surface then rotates, contacting the print material which transfers the ink.

Print Charges	Flexo printing - Call for quotation.
Setup Charges	Plate Setup Charges may apply
PMS colors	Additional charge for colors not listed.

Thermal Pressure Sensitive Signs

SATO-400 FLORATHERM (FT)

The floratherm material is designed with an aggressive adhesive with a face stock that resists water and sunlight while providing a superior thermal transfer print surface. The signs can be applied to smooth damp containers, flats, and trays. Signs may be printed with decorative borders and your company name or logo. Signs can also be flood coated to create additional color options.

Thermal Transfer Pressure Sensitive Paper Labels

SATO-TRANSFER 200P

The face sheet is thermal receptive and can be floodcoated in various colors to be used in case labeling and for product identification in warehouses. The high-quality face sheet is coupled with an aggressive, permanent adhesive to ensure long-term adhesion of the label. If direct thermal printing is the preferred print method, SATO also offers direct thermal pressure sensitive paper labels for various applications.

PRINTER LEGEND

ENVIRONMENTALLY RUGGED RFID

With the SATO America rugged RFID tagging solutions, you can quickly identify the number and location of plants without manually counting each one. The tags are augmented with increased adhesion and RFID inlay durability, making our solution an even better fit for applications that require more strength and durability. Attach tags to individual plants efficiently tracking plant movements throughout the supply chain, from propagation to shipping. RFID readers can automatically capture plant data, reducing manual data entry errors and saving time. SATO America's rugged RFID solution is durable enough to exist in challenging environments.

Applications:

- Track growth parameters, disease susceptibility, and treatment history
- Available in pot stakes, hang tags, and slip-on tags

Recommended Printer:

TXPEX6 - RFID

Benefits:

- Monitor plant health
- Optimize growing conditions
- Trace product origins
- Improve operation efficiencies
- Reduce manual data entry
- Shipment validation

PRODUCT HIGHLIGHTS

HOLIDAY TREE & WREATH TAGS!

See Page 37

SATO can help you prepare for the holidays! We offer custom tags perfect for your holiday trees, wreaths or garland. SATO can create and produce a variety of sizes and designs customized to fit your needs, including common industry sizes of 1" x 12" and 1" x 18". These tags can come with a perf-end, allowing customers to remove the portion of the tag with a barcode or QR code.

WHAT IS A QR CODE? HOW TO SCAN?

Basically, a QR code works in the same way as a barcode at the supermarket. It is a machine-scannable image that can instantly be read using a Smartphone camera. Every QR code consists of a number of black squares and dots which represent certain pieces of information.

How to scan a QR code with your iPhone, iPad, or iPod touch
1. Open the Camera app from the Home Screen, Control Center, or Lock Screen
2. Select the rear facing camera. Hold your device so that the QR code appears in the viewfinder in the Camera app.
3. Tap the notification to open the link associated with the QR code.

How to scan a QR code on your Android Phone
1. Press and hold the home button.
2. Then tap Lens
3. Point your camera at the QR code.
4. Then tap the magnifying glass icon to scan the QR code
5. Finally, tap the pop-up notification

T-Stakes and Injection Molded Stakes

T-Stakes are produced from 30 mil white polystyrene for easy insertion into most soil. They may be purchased blank or preprinted in one or two colors. Our fade resistant pens (See pg. 34) can be used to write on these stakes.

Injection Molded Stakes are made of heavy-duty plastic from 55 mil to 70 mil thicknesses. These stakes are sturdy enough to be inserted into most mediums. Surfaces accept writing with fade resistant marking pens. (See pg. 34)

Pressure Sensitive Labels are available for most injection molded stakes.

Please see pages 18 and 19 for appropriate labels.

- Reliable and versatile handheld labeling solutions

Ringer and Rings

The ringer has revolutionized the auto-ringer market with its "pneumatic-like" action and ease of use. From balling and burlapping, to tagging of pots, this tool puts affordability with quality. The "D" shaped ring creates a triangle "△" when attached.

G7 Auto Ringer and Rings

The application of the self-feeding principle to the familiar hog ring plier meets a need that all users of this fastening method have been waiting for. The auto ringer cuts operating time and costs, and increases savings and profits. A very useful tool on every job within the range of this staple size. The SR8GPL rings for the G7PL are galvanized. The "C" shaped ring creates a circle "◯" when attached.

The Economy – A SATO Brand Story

Before 1953, "state-of-the-art" plant identification was a white plastic stake and a magic marker. Then along came Economy Label Sales – inventor of the Slip-On® tag. While the technology awed and amazed, decades later it became even more impressive when Economy introduced thermal printed plant tags, a process which truly transformed the landscape of horticulture marketing.

Meanwhile in Japan, Yo Sato, who established SATO in 1940 to manufacture and sell packaging machinery, was developing his own innovative technologies including one of the first hand labelers in 1962 and the world's first thermal transfer label printer in 1979. Today, SATO America manufactures innovative, reliable auto-identification systems and offers complete solutions to businesses by integrating hardware, software, media supplies and maintenance services.

From the beginning, both companies were on parallel paths to leadership in their respective industries: Economy in horticulture and SATO in printing solutions.

Over the years, tagging and labeling has grown to critical proportion for horticulture production and marketing requirements. Today, tracking, shipping, merchandising, marketing and the transactional accounting of plant material are synonymous with profitability.

So, it seems only natural that two industry leaders would come together under the Horticultural Division of SATO America, LLC.

And the rest is history. Economy Labels & Tags – a SATO Brand – specializes in developing and perfecting the solutions that help retailers and growers to flourish, including but not limited to:

- Slip-On® Tags, Pot Tags, Labels, Signage

- Affordable Thermal Printers and Software

- And much more
